WEEKLY OVERVIEW

Quarter 1.

Week 1: Wanna Play a Game?

Week 2 Logic Puzzles and Sets.

Week 3: Square Game I. Setup and learning to play.

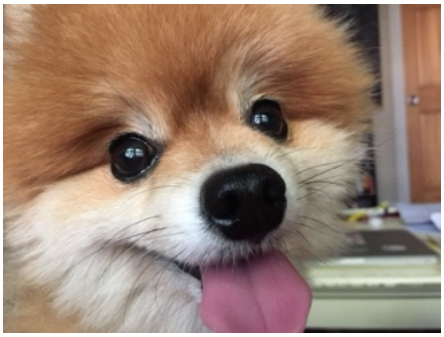

Week 4: Square Game II: Start solving equations. Asking questions.

Week 5: Build Natural Numbers, Addition Multiplication.

Week 6: Inventing Negativity :'(Ask questions, extend to integers!

*Week 7: Addition and Multiplication. Together at last! *Distributive Law.*

Quarter 2.

*Week 1: Multiplied We Stand. Divided We Fraction! *We ask and we extend to rationals! *Addition, Multiplication .*

*Week 2: Let's be rational. Let's make word problems! *Students create word problems with fractions.*

*Week 3: Ratios are underrated. But rates are over ratioed. *Word problems/ activities involving rates and ratios.*

Thanksgiving Week: Creative math activities, review, and play Set and CLR games.

Week 4: This lesson is 30% *perseverance,* 40% *patience, and* 50% *miscellaneous. *This lesson is about percents.*

*Week 5: How to Tell Your Vegan Math Teacher is Irrational *Ask questions about squaring. Extend to irrational numbers!*

Week 6: Graphs, maps and points!

Week 7: Group presentations! Holiday activity.

Happy New Year!

*Week 8: Meet My Imaginary Friend *Ask questions about squaring. Extend to imaginary numbers!*

Week 9: Relations: proportional and inequalities.

Week 10: Relations and Functions!

Quarter 3.

Week 1: Functions: One to one, many to one, inverse?

Week 2: Linear Function Fun!

Week 3: What's the inverse of linear? Also linear!

Week 4: More linear!

Week 5: Polynomial Land!

Spring Break Week: When?

Week 6: If you like it, put a ring on it!

Week 7: Polynomial Properties: Roots, End Behavioral Issues.

Week 8: Smile or Frown: What It Means to Be a Quadratic .

Week 9: General polynomial graphs, and estimation.

Week 10: Wiggles and Roots: Fundamental Theorem of Algebra.

Quarter 4.

Week 1: Geometry: Euclid Land!

Week 2: Geometry: Angles and Triangles!

Week 3: Geometry: Shapes, Polygons, Area, and Volume.

Week 4: Metric spaces: Going the Distance!

Week 5: Metric spaces: Squaring the Circle?

Week 6: Probability: Throwing darts and dropping toothpicks.

Week 7: Probability: Yes, we will meet Kolmogorov. He will teach us how to think.

Week 8: Probability: Sample Spaces, so Random!

Week 9: Stats: Coming back to percentages but with data!

Week 10: Group presentations!
